Blackberry 8310 OS 4.5 Is Out!

Check on google and I started to use the .69 version as of August 10th.

Stable version and now the video works plus newer formatting. But soon I found out that I can no longer complete a full backup!

UPDATED

September 8th, 2008 **NEW**

Ok, so now we find out the .55 is more stable than .69. 8310 does not agree completely with .69 version and .69 causes a bit of heartburn for the 8310. I could not backup the device and experienced now way to complete a full backup. So, I moved everything back to .55 and it is stable. There is an issue with .55 that I found out by reading the Blackberryforums.net. The sound is quieter. What do I mean by this? The actual volume is set quieter than on the 4.2 OS. If you use speaker phone and pay attention, you will notice a subtle change from 4.2. 4.5.0.55 is quieter! hmeister...
