**Credit Crisis UK**

**Model: 9000**

**PIN: N/A**

**Carrier: Vodafone DVD to BOLD in one step! - 10-10-2008, 04:02 AM**

-----  
**Programs required:**

**1: Slysoft ANYDVD 2: Slysoft CloneDVDMobile**

-----  
**Install both, you can use a 21 day trial before spending any money.**

**Navigate via windows explorer to:**

**Program Files Slysoft CloneDVDMobile**

**Look for the file devices.ini (save a copy just incase)**

**Open it in 'notepad'**

-----  
**Scroll down to Blackbery 8800 (change 8800 to 9000 if you like)**

**Change the resolutions to:**

**480 x 320**

**Change frame ratio to 16:10 (If anyone knows the exact best ratio to put here let me know)**

**Change frame rate to 25 (Bold can handle this easily it seems).**

**Save the file.**

-----  
**Plug in your bold via USB.**

**Make sure anydvd is running in your sys tray.**

**Run dvdmobile. Browse to the disc and it should only highlight the main film track.**

**Go to the next step and set your preferred views. You can have it letterboxed or zoomed in as much as you like to fill the screen but lose some picture.**

**Set the output folder as the video folder on your media card (make sure you put the film name in the file path before the .avi**

**ie j:/blackberry/video/new\_film.avi**

**Choose 1 2 or 3 passes for quality.**

**Set it going.**

**I use 2 pass and it takes about 25 minutes from start to finish for a perfect transfer.**

-----

**Hope this helps some people out**

**Let me know how you get on or if you're able to make any improvements.**
