Need to find a port description?

sh int desc OR show interface description

This is not a well documented command and can really come in handy trying to find descriptions of ports.

Especially on a 48 port switch....

```
----- #sh int desc
Interface      Status      Protocol Description
Gi1/0/1       admin down  down
Gi1/0/2       up          up      data-vlan
Gi1/0/3       up          up      voice-vlan
Gi1/0/4       up          down    guest-vlan
Fa1/0/1       up          up
Fa1/0/2       down       down
Fa1/0/3       up          up
Fa1/0/4       down       down
Fa1/0/5       up          up
Fa1/0/6       down       down
Fa1/0/7       down       down
Fa1/0/8       down       down
Fa1/0/9       down       down
```
