Just some additional topics and FAQ's for taking either the CCNA or ICND2 Exam.

I have sat both exams and I can tell you from experience that time management is necessary to pass all Cisco exams. For example, I sat the ICND1 exam and was doing fine working through about half of the exam. On my time I am assuming that all simulators have been completed past the half-way mark. This was not the case and the 2nd to last question was a sim. This happened on ICND1 and CCNA!. So watch your time!. If you have 3 to 4 minutes left and two questions like in my circumstance and thinking your going to click off a quick 2 questions you may get a surprise and get a sim.

Good Luck...
