Cisco PIX 515 6.3 - Factory Reset

These are the command i did to reset a cisco pix 515e firewall:

```
<firewall> en
```

```
Password: *****
```

you will see it changes to enable mode:

```
firewall#
```

```
firewall# write erase
```

```
reboot the firewall
```

```
firewall# reload
```

```
Erase configuration in flash memory? [confirm] yes
```
