

Joomla 1.5 JA_Purity Template - Top Menu

Recently having issues with the default template JA_Purity using Joomla 1.5.10. I could not figure out how to setup the top menu. This was snipped from a forum - Thank you to Jaway at Joomla Forum...

(snip)

Extensions -> Module
I click on "Main Menu"

Once in edit mode I switched:

Position = hornav
Always show sub-menu items = Yes

This did the trick for me.☐

Also, if you need to find the default module positions, you can go to this page here...
