

## Joomla 1.5 JA\_Purity Template - Top Menu

Recently having issues with the default template JA\_Purity using Joomla 1.5.10. I could not figure out how to setup the top menu. This was snipped from a forum - Thank you to Jaway at Joomla Forum...

(snip)

---

**Extensions -> Module**  
**I click on "Main Menu"**

**Once in edit mode I switched:**

**Position = hornav**  
**Always show sub-menu items = Yes**

**This did the trick for me.☐**

---

Also, if you need to find the default module positions, you can go to this page here...
