

The freeBSD PFSense WatchGuard General SOHO setup...

Still working on this product, pfsense with Watchguard X700, and it is getting better with the more reading I do.

Lots of setups and combinations plus hardware choices...

DNS Blacklist [here...](#)

Transparent Proxy [here...](#) & [here...](#)

URL Filtering [here...](#)

Traffic Shaping [here...](#)

Pfsense and Rules

PFSense Forum describing LCD and LED [here...](#)

Going forward with squidguard and some other setups...

Good luck and let me know if your doing anything with this...

H.
