## Start Menu Shared by All Users

1. Open the Start Menu.

A) Right click on **All Programs** and click on **Open All Users**. (See screenshot below)

B) Go to step 3.

**OR**

2. Open the Start Menu.

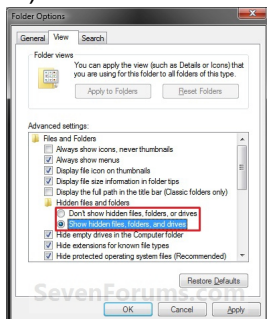

A) In the search box, type **shell:common start menu** and press **Enter**.

B) Go to step 3.

**OR**

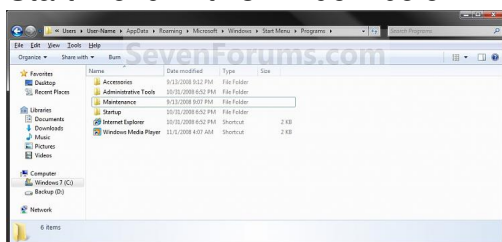

3. Open [Folder Options](#).

A) Dot **Show hidden files, folders, or drives**, and click on **Apply**. (See screenshot below)

B) Open Windows Explorer and navigate to the location below. (See screenshot below step 5)

Code: `C:\ProgramData\Microsoft\Windows\Start Menu\Programs` 4. You can now Copy and Paste shortcuts, Drag and Drop shortcuts, and create New Folders that you want in the Start Menu in this window below.

5. If you did step 3, then in [Folder Options](#) again, dot **Don't show hidden files, folders, or**
